PIYUSH YADAV

+91 8595955136 yadavpiyush1010@gmail.com LinkedIn Github

Summary

B.Tech Software Engineering graduate from Delhi Technological University with hands-on experience in SQL, Python, product analytics, and experimentation through projects in A/B testing, user behavior, and subscription analytics. Skilled in product metrics, funnel and cohort analysis, retention, user segmentation, KPI tracking, and data-driven product recommendations.

Technical Skills

Product Analytics: Product Metrics, KPI Tracking, User Behavior Analysis, Feature Adoption, Funnel Analysis, Cohort Analysis, Retention Analysis, Churn Analysis, Customer Journey Analysis, User Segmentation
Experimentation and Statistics: A/B Testing, Experiment Design, Hypothesis Testing, Statistical Analysis, Conversion Analysis, Feature Evaluation, Feature Engineering
Programming and Data Analysis: SQL, Python (Pandas, NumPy), MySQL, PostgreSQL, Data Cleaning, EDA
BI and Visualization: Power BI, Tableau, DAX, Power Query, Dashboard Development, Data Visualization, Data Storytelling
Tools and Collaboration: Microsoft Excel, Microsoft PowerPoint, Git, GitHub, Claude, Chatgpt, Stakeholder Communication, Cross-functional Collaboration

Projects

A/B Testing and Experimentation | *SQL · Power BI · Python · SciPy* | GitHub

- Designed and analyzed 20+ A/B experiments using SQL and Python, applying statistical hypothesis testing to evaluate product feature performance and user behavior.
- Measured experiment outcomes across Conversion Rate, CTR, User Retention, and Revenue, identifying winning variants that increased feature adoption by 14%.
- Developed interactive Power BI dashboards comparing experiment variants, user segments, and product KPIs, translating test results into data-driven product recommendations.

User Behavior Analytics | *SQL · Power BI · Python* | GitHub

- Analyzed 5M+ user interaction events using SQL and Python to understand customer journeys, feature adoption, engagement patterns, and user behavior through clickstream analysis.
- Built interactive Power BI dashboards using funnel analysis, cohort analysis, retention, and conversion metrics, identifying key drop-off points across the customer journey.
- Generated data-driven product recommendations based on behavioral insights, identifying opportunities to improve conversion, feature adoption, and user retention.

Subscription Analytics | *SQL · Power BI · Python* | GitHub

- Analyzed 2M+ subscription records using SQL and Python to evaluate customer retention, Monthly Recurring Revenue (MRR), Annual Recurring Revenue (ARR), Customer Lifetime Value (CLV), and subscription performance.
- Performed cohort and retention analysis to identify renewal patterns, churn trends, and high-value customer segments, supporting data-driven retention and monetization decisions.
- Developed interactive Power BI dashboards tracking MRR, ARR, renewal rates, retention, churn, and subscription KPIs to support product performance monitoring and stakeholder reporting.

Certifications and Achievements

- IBM Product Manager Professional Certificate — Product strategy, development, and market analysis.
- Microsoft AI Manager Professional Certificate — AI strategy, adoption, and business applications.
- Packt Product Management Certificate — Product strategy, development, and prioritization.
- Google Data Analytics Professional Certificate — Data analysis, SQL, visualization, and decision-making.
- Cisco Data Analytics Essentials — Data analysis, visualization, and analytical fundamentals.
- Solved 250+ SQL and analytics problems across LeetCode and HackerRank.

Education

Delhi Technological University **New Delhi 2022–2026**
Bachelor of Technology (B.Tech), Software Engineering

Position of Responsibility

Cultural Council Society, DTU — Head
ed a team of 40–50 members and coordinated 11+ college initiatives and cultural events, contributing to large-scale events with 40K–50K+ total attendees.
