Summary

B.Tech Software Engineering graduate from Delhi Technological University with hands-on experience in SQL, Python, Excel, and Power BI through projects in financial, fraud, e-commerce, and customer analytics. Skilled in data analysis, EDA, risk analytics, KPI reporting, data visualization, and dashboard development, with experience analyzing large transaction datasets to identify fraud patterns and generate data-driven insights.

Technical Skills

Programming and Querying: SQL, Python (Pandas, NumPy), DAX
Data Analysis: Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Analysis, Data Validation, Root Cause Analysis
BI and Visualization: Power BI, Tableau, Dashboard Development, Data Visualization, KPI Reporting
Excel and Databases: Microsoft Excel, Pivot Tables, XLOOKUP, Power Query, MySQL, PostgreSQL
AI/ML: Generative AI, Machine Learning, Prompt Engineering, Scikit-learn, XGBoost, Feature Engineering, Classification, Model Evaluation, Fraud Analytics, Risk Analytics
Tools: Git, GitHub, Microsoft PowerPoint,

Projects

Banking Fraud Detection Analytics | *SQL · Power BI · Python · Scikit-learn · XGBoost* | GitHub

- Analyzed 300K+ banking transactions using SQL and Python, applying data cleaning, exploratory data analysis (EDA), feature engineering, and transaction-level risk analysis to identify fraudulent patterns and anomalies.
- Engineered 25+ transaction risk features and developed an XGBoost fraud classification model achieving 84% accuracy, 81% precision, and 87% recall for identifying high-risk transactions.
- Built an interactive Power BI dashboard tracking Fraud Rate, Transaction Volume, Merchant Risk, Geographic Hotspots, and High-Risk Transactions to support risk monitoring and data-driven decision-making.

E-commerce Performance Analytics | *SQL · Power BI · Excel · Power Query* | GitHub

- Evaluated 50K+ e-commerce transaction records using SQL and Excel for revenue, profit, orders, Average Order Value (AOV), customer growth, product performance, and return trends.
- Used SQL aggregations, joins, and CTEs alongside Power Query for data cleaning and transformation, identifying seasonal trends, underperforming categories, and regional performance patterns.
- Developed an interactive Power BI dashboard with KPI cards, trend analysis, product/category performance, customer metrics, and profitability views for business performance analysis and reporting.

Customer Churn and Retention Analytics | *SQL · Power BI · Python · Scikit-learn · XGBoost* | GitHub

- Processed and analyzed 120K+ customer records using SQL and Python to perform data cleaning, exploratory analysis, customer segmentation, and churn-driver analysis across customer and behavioral attributes.
- Built and evaluated an XGBoost churn prediction model achieving 87% accuracy and 0.84 F1-score, identifying high-risk customer segments and key factors associated with customer attrition.
- Developed an interactive Power BI dashboard tracking Churn Rate, Customer Lifetime Value (CLV), Retention Rate, and Revenue KPIs to support data-driven retention analysis and streamline KPI reporting.

Achievements

- Microsoft Certified: Data Analyst Associate — Power BI and DAX
- Google Data Analytics Professional Certificate — Data analysis, visualization, and analytics fundamentals
- Cisco Data Analytics Essentials — Data analytics and visualization
- Deloitte Data Analytics Certification — Data analysis and business insights
- NPTEL Certification in Python Programming — Python programming and data analysis
- Solved 250+ SQL and analytics problems across LeetCode and HackerRank, strengthening SQL and analytical problem-solving skills.

Education

Delhi Technological University **New Delhi 2022–2026**
Bachelor of Technology (B.Tech), Software Engineering

Position of Responsibility

Cultural Council Society, DTU — Head
Led a team of 40–50 members and coordinated 11+ college initiatives and cultural events, contributing to large-scale events with 40K–50K+ total participants/attendees.
